

• Chasier

Node JS Express JS MYSQL React JS Bootstrap 4 Ant Design

<https://github.com/diky-satria/fullstack-chasier>

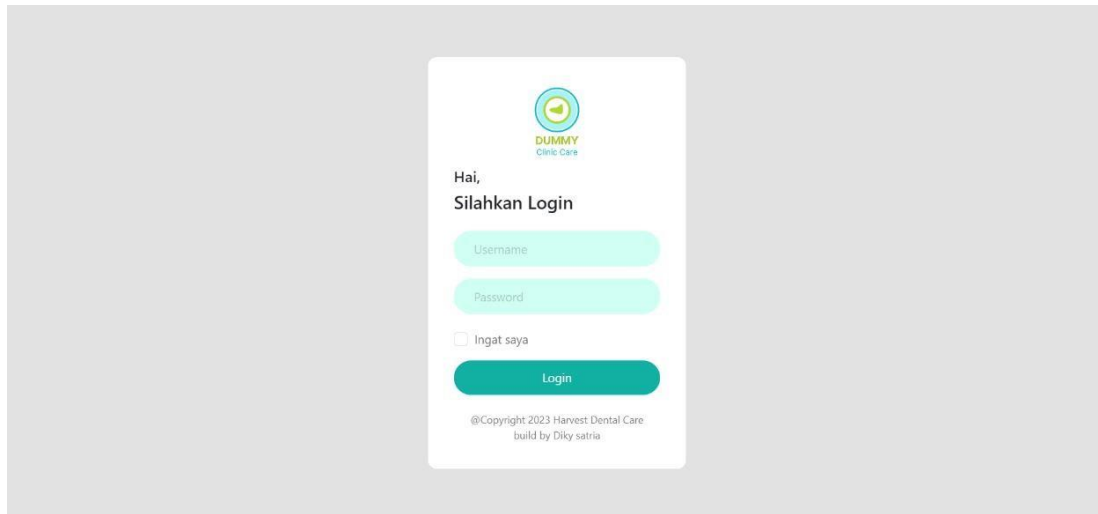

Web-based cashier application that aims to make transactions at one of the clinics in Jakarta. However, in its application this application is used only on local computers, because it adapts to client requests.

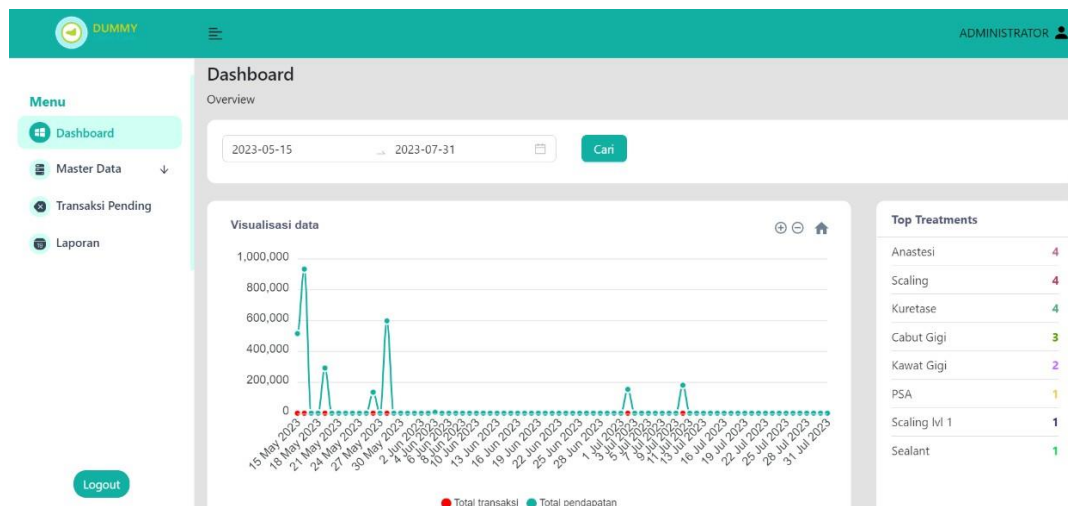

Short Demo Application

- Admin

1. Login page

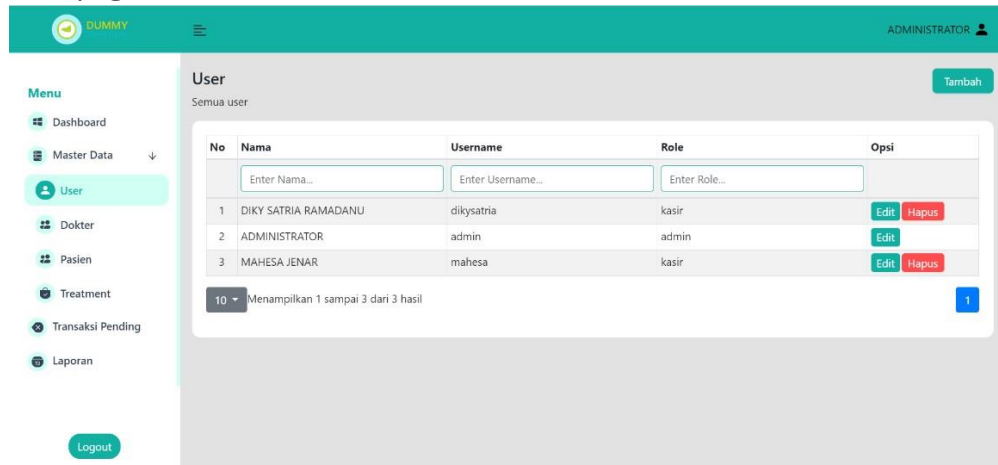

2. Dashboard page

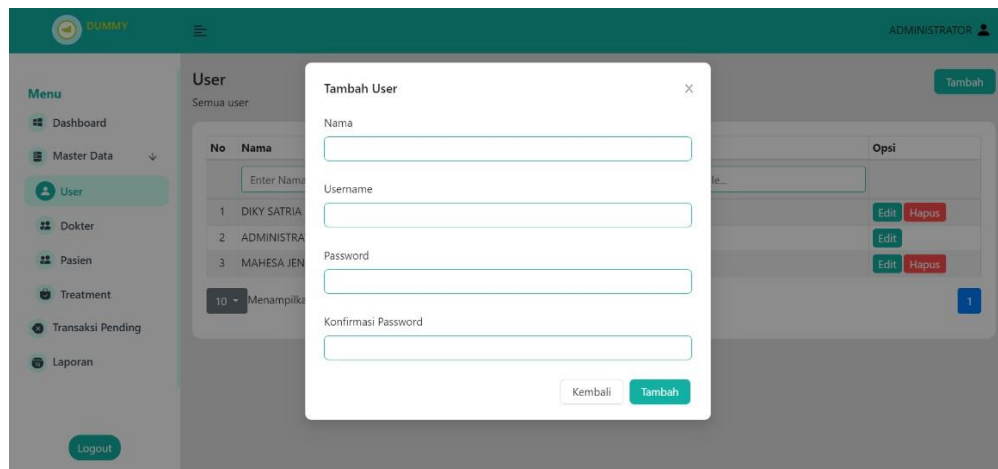

3. Master data

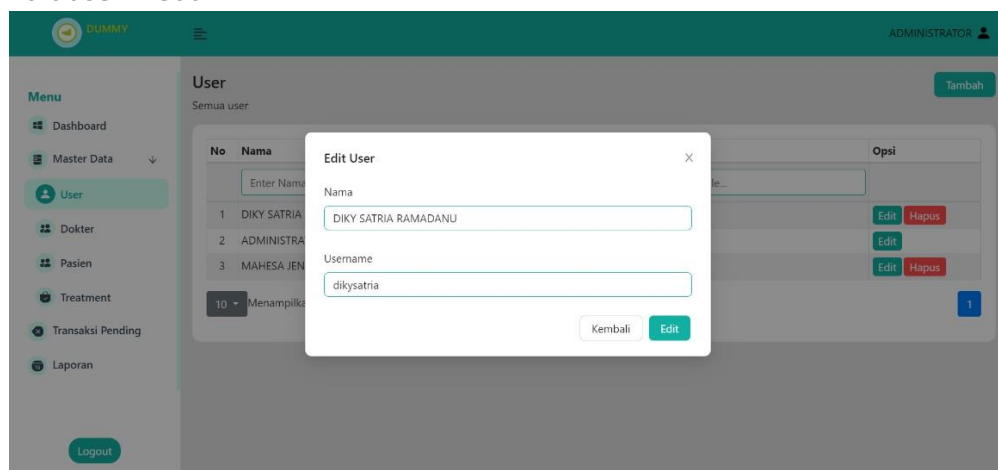

- User
- User page

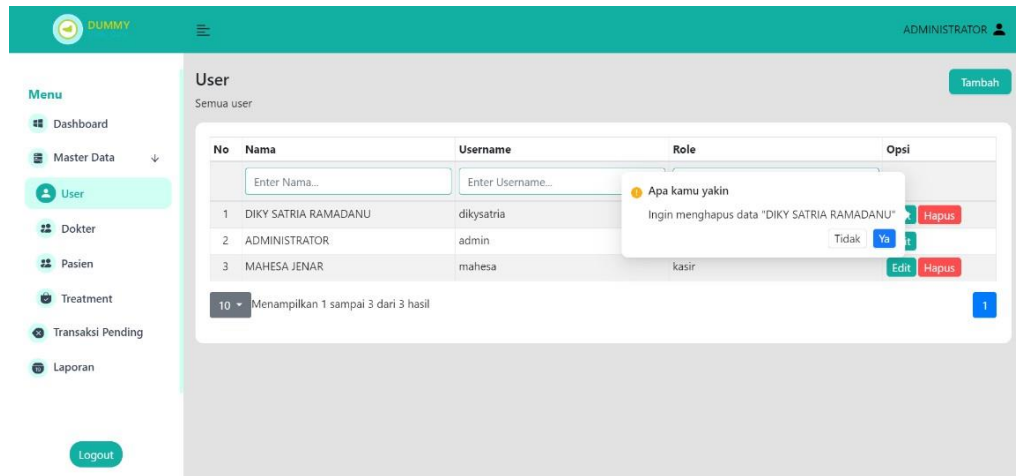

- Add user modal

- Edit user modal

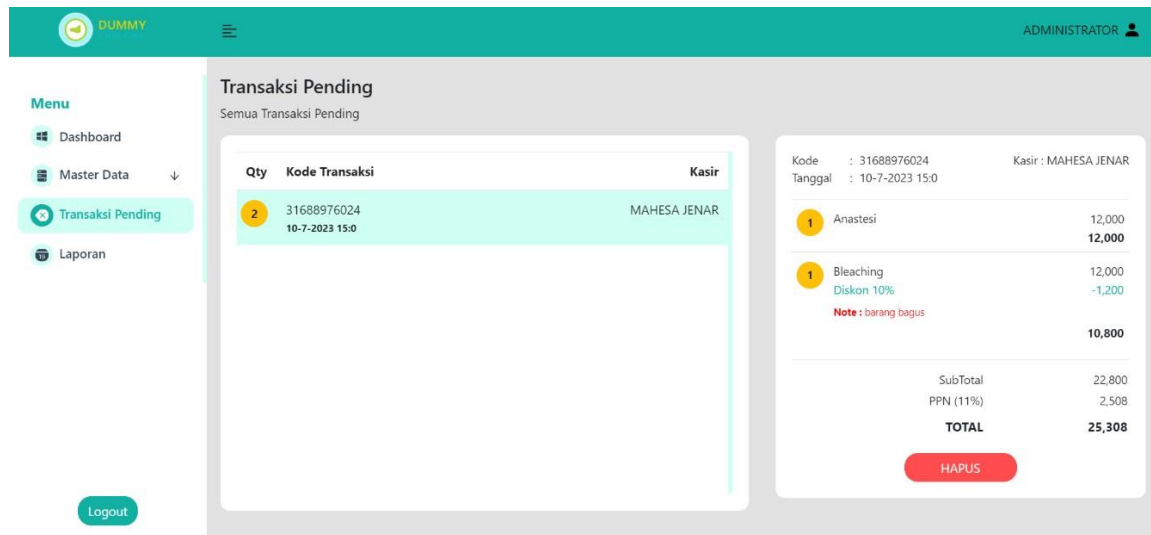

- Delete user

- Dokter (have the same UI/User Interface with user)
- Pasien (have the same UI/User Interface with user)
- Treatment (have the same UI/User Interface with user)

4. Pending transaction page (admin has the delete button only)
