# Kasir

# Node JS Express JS MYSQL React JS Bootstrap 4 Ant Design

# https://github.com/diky-satria/fullstack-chasier

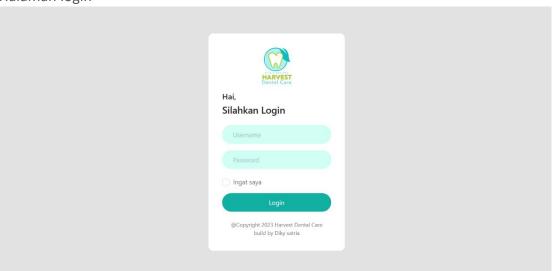

Aplikasi ini adalah aplikasi kasir berbasis web yang bertujuan untuk melakukan transaksi di salah satu klinik di Jakarta. Namun dalam penerapannya aplikasi ini digunakan hanya di local komputer saja, dikarenakan menyesuaikan dengan permintaan client. Aplikasi ini memiliki 2 role akses yaitu, admin dan kasir.

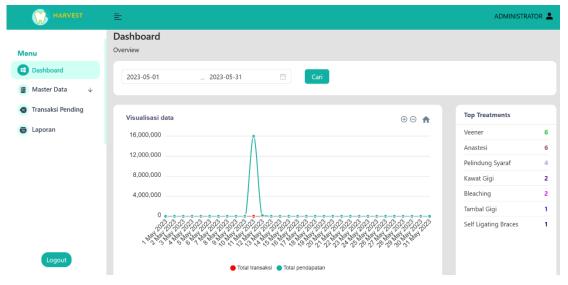

# Demo singkat aplikasi

- Admin
  - 1. Halaman login

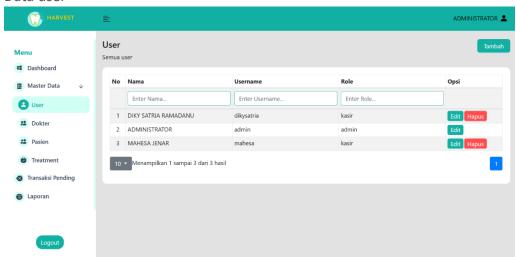

## 2. Halaman dashboard

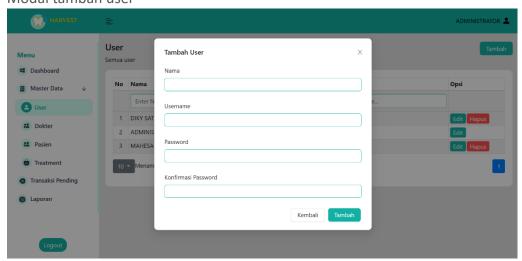

#### 3. Master data

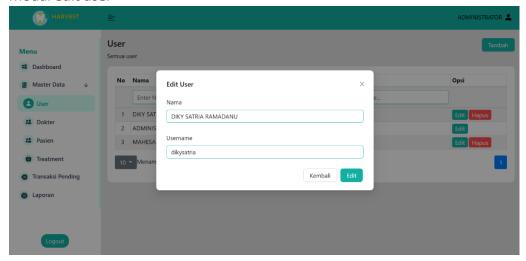

- User
  - Data user

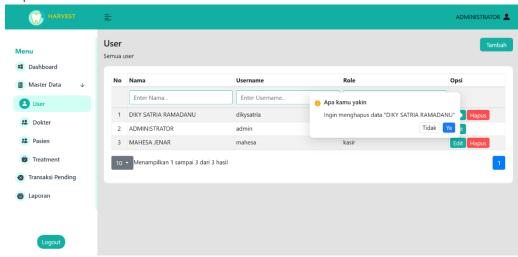

Modal tambah user

Modal edit user

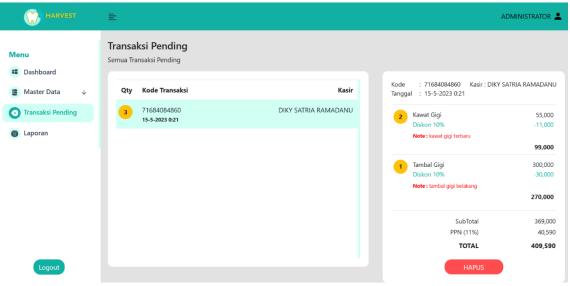

• Hapus user

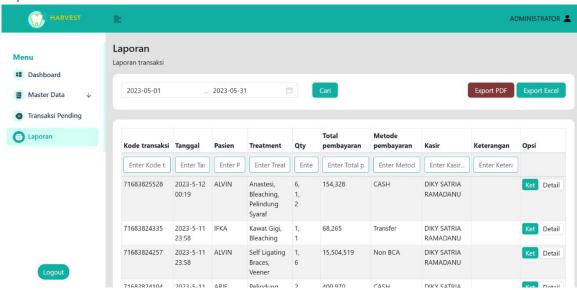

- Dokter (tampilan dokter sama dengan user, hanya perbedaan data saja)
